

Every other gate lock **SUCKS** compared to the new **PAC-LINK Locking System.**

(Yup, it's patented.)

The **ONLY** way to use a shackle-less hockey-puck padlock to lock your fences and gates!
No shackles to cut here!

No ball bearings to rust and no actuators to break.
Just no nonsense physical security!

Available to work with any standard SFIC and Key-In-Knob Cylinders from BEST, Medeco, or Assa.

The Link can either be bolted or welded directly to your gate.

The "Link" is made from investment casted stainless steel for durability, strength, and harsh weather conditions.
